

idxSoft LLC Announces Update to PicBlitz Photo Viewer and Organizer V3.21

PicBlitz Photo Viewer and Organizer is a very fast, full featured image viewer and organizer for Windows with a do it first, save it later design. Mouse hovering makes it extremely user friendly, blazingly fast and intuitive.

Prospect, CT (idxSoft LLC) 10/10/2011 FOR IMMEDIATE RELEASE

idxSoft LLC has released PicBlitz Photo Viewer and Organizer V3.21, featuring a viewer with video-like speed and an organizer with a do it first, save it later design supporting all major digital camera formats. The viewer has a no-click, mouse hover design. Mouse over an image and it is displayed in the blink of an eye, so fast, it will surprise you. Instantly search by filename; thousands of results are returned in an instant. Quickly resize, rotate, brighten, and colorize any number of photos at once, saving them only after you've checked the results. Organize your photos by using copy, move and rename commands first, verifying the results and then updating the hard drive. Version 3.21 features a price reduction, enhanced help system and bug fixes. Download a free 21 day trial at <http://www.idxsoft.com>.

Imagine having your photos viewed as fast as a video; PicBlitz unleashes the power hidden inside of your PC. It's designed to work the way humans think: Organize and modify first, double check everything and then safely write to disk. Do you a lot of images? PicBlitz is designed to work with client/server, removable drives and desktop environments. Starting with an on-demand drive scan, the folders and drives you specify are loaded into a memory based matrix. The scan is very fast and is run when you decide, not in the background. It easily handles well over 500,000 files and shows file structure even if a drive has been disconnected.

A split second viewer, no-click interface, centralized file structure, slide show, immediate file search and save it later design are just a few of the easy, fast and unique features of PicBlitz. A short description could never explain all the power and speed PicBlitz has; try it yourself, risk-free, fully functional for 21 days. You'll fly through JPEG, PNG, BMP, GIF, ICO, and GIF formats. View RAW digital camera formats such as .NEF and more. Give it the test, scan everything on your drives; see images you never knew existed. PicBlitz integrates with Windows Explorer and external software. It's designed for professionals. A home version handles 50,000 images (35% off). Runs on Windows 7, Vista, XP and has passed Microsoft designed tests to ensure compatibility. Find out more at <http://www.idxSoft.com>

idxSoft LLC, located in Prospect CT, develops software using Microsoft .NET technologies for Windows, using proprietary data matrix objects which result in outstandingly fast software. In addition to PicBlitz, look for new word document and PDF phrase search software coming out soon. It returns results similar in speed to online searches.
